Re: Appl. # 10/032,535 – Method and System For Facilitating Secure Transactions

Dear Tim:

Thank you for meeting with me yesterday on the above application, and for arranging for SPE Sough's attendance. I know the meeting was a long one because of the complexity of the application and the claim set, but I think that together we made excellent progress in addressing the Office Action rejections and further defining the invention over the prior art.

I will shortly file a formal amendment containing the arguments we discussed and the amended claim language we developed.

Sincerely,

John A. Galbreath
